

# Avionics databus and embedded solutions

MIL-STD-1553, ARINC 429 and more

Intuitive CoPilot software with Automated Test

Pocket-sized, portable, easy-to-use, quick USB connection, durable.

Rugged Computers

High performance, best-in-class SWaP, avionics I/O, pre-validated, COTS...

High performance, best-in-class SWaP, avionics I/O, pre-validated, COTS...

## Celebrating 25 Years of Innovation

In 1986 Ballard Technology pioneered the use of personal computers as the host for specialized test equipment for the aerospace industry. Today, a quarter-century later, commercial, military and government customers around the world have come to rely on Ballard's innovative products for avionics databus test, simulation and embedded applications.
